

HUBBARD COUNTY WATERCRAFT INSPECTION SUMMARY
2009 - 2020

Hubbard County Coalition of Lake Associations (HC COLA) has been instrumental in protecting Hubbard County lakes and rivers from aquatic invasive species (AIS). The watercraft inspection program, initiated by HC COLA in 2009, has been a major component in shielding our lakes from AIS. Since 2013, the watercraft inspection program has been coordinated by the SWCD (2013-2014), then by Hubbard County (2015-present). HC COLA remains an active partner in the program. As noted in the table below, watercraft inspections have been a key factor in educating boaters coming to Hubbard County to enjoy our beautiful lakes. The table below represents the total number of inspections per year, the % of watercraft entering from infested waters, the % of watercraft with the drain plug in on arrival to a Hubbard County lake and funding summary for watercraft inspections since 2009.

Year	Total Number of Inspections	% Entering from infested waters	% Drain Plug in on Arrival	Funding Summary for each year from: State, Lake Associations (LA) and Township/City
2009	910	7.89%	NA	DNR Grant - \$3000 Lake Emma Township - \$1000 LA - \$2000 (Zorbaz - \$500 incl.) Total = \$6000
2010	1772	NA	NA <u>Drain plug law was passed in July of 2010</u>	DNR Grant - \$3720 Townships - \$2220 LA/COLA = \$4640 Total = \$10,580
2011	1236	NA	7.28%	DNR Grant - \$4805 Townships \$1720 Lakes= \$5224 Total = \$11749
2012	7,129	NA	NA	Township/City = \$21K LA = \$57K Total = \$78,000
2013 <u>(SWCD took over coordination)</u>	10,664	9.5%	5.3%	DNR LGU Grant = \$7,750 Township/City = \$35,990 LA =\$ 63,905 Total =\$107,645
2014	13,785	13.35%	2.37%	DNR LGU Grant = \$12,000 Township/City = \$34,800 LA = \$88,746 Total = \$135,546
2015 <u>(Hubbard County took over coordination)</u>	21,059	9.01%	2.74%	State = \$163,200 LA = \$58,422 Township/City = \$31,741 Total = \$253,363

Year	Total Number of Inspections	% Entering from infested waters	% Drain Plug in on Arrival	Funding Summary for each year from: State, Lake Associations (LA) and Township/City
2016	22,757	10.98%	1.15%	State = \$168,070 LA = \$71,759 Township/City = \$30,570 Total = \$270,399
2017	21,559	12.55%	.87%	State = \$151,145 LA = \$83,889 Township/City = \$31,111 Total = \$266,145
2018	21,725	21.33%	.68%	State = \$152,477 LA = \$86,699 Township/City = \$30,691 Total = \$269,867
2019	23,834	23.17%	.82%	State = \$182,658 LA = \$101,887 Township/city = \$37,668 Total = \$322,213
2020	24,309*	33.38%	1.01%	State = \$126,672 LA = \$108,670 Township/city=\$42,006 Total = \$277,348 *Five Accesses had sporadic missing surveys due to inspector equipment malfunctions; inspection total may appear low as a result.
Total funding for Watercraft Inspections from 2009-2020	169,503*			State/DNR = \$975,497 Lake Assoc. = \$732,841 Township/city = \$300,517 TOTAL = \$2,008,855 *For 2020, Five Accesses had sporadic missing surveys due to inspector equipment malfunctions; inspection total may appear low as a result.

The **State funds** that are listed above were spent directly on watercraft inspection hours at Hubbard County accesses. There are additional State funds associated with operating shifts (decontamination station, training, lead inspector wages, etc.) Hubbard County has spent a total of \$233,712 (2013-2020) to help fund the Hubbard County AIS Coordinator.

The success of our AIS prevention program can be noted by the following facts:

- The low numbers of infested waters in Hubbard County as compared to neighboring Counties.
- A total number of 169,503* watercraft inspections have been conducted from 2009 through 2020. [*For 2020, Five Accesses had missing surveys due to inspector equipment malfunctions; inspection total may appear low as a result.]
- The decrease in % of boats with drain plugs in on arrival to Hubbard County lakes demonstrates the impact of Hubbard County's watercraft inspection program; hovers approximately now at 1%.
- The financial support that HC COLA and Hubbard County has received from state and local funding sources has been a key factor in protecting our lakes from AIS as well as providing jobs for people doing AIS work which represents money going into our local economy.

Hubbard County has been largely successful in shielding our lakes from AIS. However, the risk of recreational watercraft coming to lakes in Hubbard County from infested waters throughout Minnesota continues to increase as noted above. Hubbard County infested waters list grew by 2 in 2020: Big Mantrap for Eurasian Watermilfoil and Long for Zebra Mussels in 2020. **Help us contain these and prevent the spread of AIS in Hubbard County!**
