

Zebra Mussel Dock and Lift Searches

Christine Herwig & Nathan Olson

MN DNR

October 2012

Simple to Do and Takes Little Time

Only a few minutes per dock or lift are needed

They may not always be abundant; you may only find one individual

Expect to see mussels <3/8" long

They prefer shaded areas; but check all surfaces!

They like nooks and crannies

When they are
well established,
they can be
abundant

Can you find the zebra mussels in these photos?
There is at least 1 mussel in each photo

Answers on the next slide

How did you do?
